

## Letter from the President

*Nov 2014*

During these past three months, we have experienced the daunting task of juggling several fast-moving activities here at Premier Coil Solutions. While on the path to a growth rate of 40% in 2014, our company has committed over \$6M to our newly built manufacturing facility in Waller, Texas. This month, I can officially say we have fully transitioned from our tightly-packed Todd Street location to our spacious and state-of-the-art Waller facility. I would like to thank all of our employees who have spent countless hours and extra effort to make this transition possible.

Our new 60,000 Sq. Ft. facility has been through a rigorous design and construction phase. We have spent months of planning with our engineering, production, inventory control, and aftermarket service teams to incorporate all of these important factors. Today, we have the production capacity exceeding over 5 times our Todd St. location while maintaining our Lean-Manufacturing Ideals and Six Sigma Compliance; not to mention our customer training capabilities and 5,000 Ft. Test Well on-site. I am positive that our customers, vendors, and company will benefit from this amazing facility.

As we enter into the 2014 holiday season and begin looking towards 2015, we are excited about our growth potential. The Board of Directors are continuously committed to dedicating resources, and influencing our company's future. We have made investment in upgraded equipment, infrastructure, and brought in new faces to structure our company for success. We are excited for an even greater 2015, with new opportunities.

I am so proud of the success we have had with this leap into the Waller Facility and I call on our entire team to remember our company's founding principle of **Continuous Improvement**. I would like to personally thank all employees, customers, and vendors for their continuous support, guidance, and dedication to our mission: to be the global leader in the design, manufacture and support of highly advanced and reliable coiled tubing equipment solutions.

I wish everyone a Happy Thanksgiving to you and your families.

Brett Witte  
President
